Business Performance Summary

Based on the analysis, the company recorded total sales of approximately \$2.3 million and total profit of about \$286,000, resulting in a profit margin of 12.5%. Overall, the business performed well across different regions, product categories, and customer segments.

Key Findings

- The West region generated the highest sales, making it the strongest-performing region during the period under review.
- The Technology category contributed the highest profit, showing that it remains one of the company's most valuable product lines.
- The Consumer segment accounted for the largest share of total sales, indicating that individual consumers are the company's primary source of revenue.
- Sales generally increased over time, suggesting steady business growth throughout the period analyzed.
- A relatively small group of products contributed a significant portion of total sales, highlighting the importance of these products to overall business performance.

Recommendations

1. Continue investing in high-performing regions, particularly the West, while identifying opportunities
